## Gather or distribute information online anywhere...

CloudCasters Mobile Emergency Public Internet Stations provide large venue outdoor crowds the ability to; sign-up, fill out forms , view pre recorded DVDs, watch breaking news of any digital TV broadcast via satellite in real time. This is all In addition to your staff having internet access with VPN capability back to the office, for email or other facility required resources.

In addition supply the captivated audience a controlled internet connection to download from or use a specific website via their personal wireless device. VOIP services available to any agency.

All WITHOUT FILLING OUT A SINGLE PIECE OF PAPER!

## What Mobile Emergency Public Internet Stations Do For You...

Deployment of light weight highly visible Mobile Emergency Public Internet Stations any where in the world where thousands of people gather initiate real time information gathering at a disaster zone and enhance the public's awareness of that disaster on the spot.

Marketing departments now have a tool to use in assembling a high impact sales strategy (while not deployed in disaster) to service a like venues taking place in multiple states or countries simultaneously. Imagine being at every major golf tournament or sporting event at once, signing up volunteers or accepting donations in real time. This is the exact opposite of today's single "bulky vehicle" or paper sign up marketing strategies we currently see.

Your imagination is limitless and no one knows your market better than you...however just for an example purpose we give the following...

1. **Scenario 1 \*Weekly Deployment:**  
A Deployment of 10 Mobile Emergency Public Internet Stations in 10 states on Saturday/Sunday at professional

and college stadiums will expose your donation capability to approximately 1,000,000 customers weekly...for the entire duration of that particular sports season!

2. **Scenario 2 \* Saturation Deployment:**

A Deployment of 3 Mobile Emergency Public Internet Stations at a large disaster site with over 100 thousand attendees, will place a total of 15 online data transmitting Kiosks in an area covering thousands of square feet. Achieving complete and total saturation of the relief area.

Mobile Emergency Public Internet Stations have “one button” operation and are completely self-contained. The interior is designed to carry relief items of any sort, including informational products of your choice meeting specific needs.

Each Mobile Emergency Public Internet Stations will carry 3-5 customized logo satellite Kiosks (data collecting points). These are deployed in and around the relief area up to 1000 feet from the Mobile Emergency Public Internet Station. All satellite Kiosks are of a heavy duty design and likewise complete real-time transactions. Our unique design of these multi-deployable data collecting points for instant online transactions of your forms while in the midst of thousands will generate the donations or collect the massive data you would expect.

Gathering names, email addresses and information for future volunteer contacts is now done while your there, online and in

real time. No more forms or paper to be processed!

If you recognize a need and a value of gathering data by attending and holding a presence at events where massive crowds gather, or have a need to be at alike concurrent events our product is the only solution in the world for you.

**Alert!** There is no time to waste have disaster victims, jump online, register they are alive now. Give them the power to do it on the spot.
